**RE: Mold Remediation & Asbestos Abatement Clearance Summary
Lakehurst School District - Lakehurst School
TTI Project No. 18-1284**

Dear Mrs. Fuhring:

TTI Environmental, Inc. (TTI) is pleased to provide **Lakehurst School District** with this status letter to provide an update to the clearance investigations conducted at the Lakehurst Elementary School building.

As part of the remediation process, clearance inspections and air samples were collected for laboratory analysis at the end of each remediation event. The clearance inspections and air testing were performed to ensure the corrective actions were successful and met the established clearance criteria. The asbestos abatement areas were conducted first and cleared prior to starting the mold remediation. The remediation process was divided into five building sections which were isolated and controlled to prevent recontamination.

Based on the visual inspections and certified laboratory analytical results all the rooms/sections of the building passed the established mold criteria as define in the Work Plan developed by TTI dated September 10, 2018. The Asbestos abatement of the floor tile and the glue dots was performed in accordance with EPA/State non-friable asbestos abatement procedures outlined in TTI's October 22, 2018 Asbestos Abatement Work Plan. The asbestos air results passed clearance criteria as established in the Work Plan.

Based on our inspection and testing TTI concludes that the subject building can be fully re-occupied. TTI recommends that no further investigation is necessary at this time.

TTI shall be producing a final Mold Remediation and Asbestos Abatement close out reports, at a later date.

We appreciate the opportunity in allowing TTI to provide you with professional environmental consulting services. If you have any questions, please feel free to contact us at any time.

Respectfully submitted,

TTI ENVIRONMENTAL, INC.

Timothy Popp
Vice President of Consulting
