Unit Overview**

Content Area: English Language Arts

Unit Title: 1

Target Course/Grade Level: Grade 5

Unit Summary

Immerse the students in literature during this unit, with a focus on the expected behaviors to be followed during a reading workshop. During the first few weeks, the teacher will establish a literature rich climate by reviewing what is available for the students to read, where it is located within the classroom, and procedures to be followed to maintain this environment. Students will read fiction and nonfiction applying strategies previously learned allowing the teacher to determine what needs to be modeled during future mini-lessons and guided reading groups. Integration of social studies and science topics is highly encouraged. This unit will also focus on conveying experience through narrative writing to develop real or imagined experiences or events using effective technique, descriptive details, and clear sequence of events. In addition, students will draw evidence from literary or informational texts to support analysis, reflection, and research. The teacher may also choose to include other genres of writing as he/she sees fit. Reading and writing should be integrated to include elements of grammar, spelling, mechanics, traits of writing, the writing process, etc. Instruction should take place in the form of whole group mini- lessons, small group mini-lessons, and guided reading/writing groups in order to meet the needs of all learners. Students will maintain a working portfolio throughout the unit. Students will demonstrate competence in keyboarding in preparation for computer-based assessments.

- Create and develop texts that include the following language conventions:
 - Sentence formation: sentences are complete and varied in length and structure
 - Conventions: appropriate grammar, mechanics, spelling and usage enhance the meaning and readability of the text.

IMPORTANT NOTE: If you are in a school where many or all teachers are setting up proficient reader classrooms, you will no longer need this monthly timeline. When your kids come to you with a great working understanding of a strategy, you will only need to fine-tune with harder texts. That will give you more time to work on the more difficult strategies like determining importance and synthesis. And remember, THERE IS NO ORDER FOR TEACHING THESE STRATEGIES. Since we use them all at once anyway, create a timeline that works for you.

1. Children will [use a variety of fix-up strategies](#) to read unfamiliar words. Students will learn to pronounce words, determine meanings in context, and figure out words using knowledge of root words, prefixes and suffixes, among other strategies. They will learn to figure out the meaning of an unfamiliar word. Sometimes that results from figuring out how to pronounce the word. Sometimes that is by inferring from context. Of the two skills, students need to know that figuring out the meaning is more important.
2. Children will deepen their comprehension by [accessing their prior knowledge](#) before reading a selection. While reading, they will learn to [make connections](#) from the text to themselves, the text to other texts and movies, and the text to world. By recognizing what is unknown in the text and thinking about what is known from personal experience, other texts and the world, the reader will build confidence in using personal connections to get meaning from what was originally unknown. By explaining how these connections help them understand the text, their comprehension will improve.
3. Students will build on their knowledge of [retelling](#) to recall important details. Students will learn to discern what is most important to use in the retelling.
4. Students will learn to [summarize](#) a small selection in as few words as possible. Students will break longer selections into smaller parts and summarize as they read. By summarizing in this headline-writing fashion, students will begin to sort out main ideas from details of the text.
5. Students will learn to [ask questions](#) before, during and after reading and to seek answers to deepen their understanding of the text. By bringing their own questions to small groups, students will examine what they don't know and get help in comprehending.
6. Students will learn to [visualize](#) the details of a text. They will use other sensory images like dramatizing and drawing to help them better understand what they are reading.
7. Children will learn to [infer \(and predict\)](#) information before, during, and after reading. Children will learn to distinguish between inferences, assumptions, and opinions by backing up their conclusions with evidence.
8. Children will be able to [discriminate what is important from what is not](#). Children will be able to use this information to [determine main ideas and themes](#) of texts.
9. Students will stop often while reading to [synthesize](#) the information gained from texts to form opinions, change perspectives, develop new ideas, find evidence, and, in general, enhance a personal understanding of the concepts presented in a text.

Unit Title: 2

Target Course/Grade Level: Grade 5

Unit Summary

Immerse the students in literature and informational text during this unit, with a focus on applying reading strategies to informational texts of the teacher's choice. The reading can be done in social studies and carry over into the language arts classroom, as appropriate. Writing should take place daily in the form of process writing, journal writing, literary analysis, responding to and comparing a variety of texts and media sources, and/or informal writing across the content areas. Unit 2 focuses on writing informative/explanatory texts to examine a topic and convey ideas clearly. Literary analysis writing should be introduced and practiced by analyzing texts and providing support for answers through close reading and quoting from the text. This unit will focus on sequence/how to and compare and contrast writing. The teacher may also choose to incorporate other explanatory writing pieces as they fit into the science and social studies curriculum. Both reading and writing should be integrated and include elements of grammar, spelling, mechanics, traits of writing, and the writing process. Instruction should take place in the form of whole group instruction in both reading and writing followed by guided reading and writing lessons in a small group setting to differentiate according to student need. Portfolios should be continuously used by the students and assessed by the teacher. Students will demonstrate competence in keyboarding in preparation for computer-based assessments.

Unit Title: 3

Target Course/Grade Level: Grade 5

Unit Summary

Immerse the students in literature during this unit, with a focus on close reading with an emphasizes using evidence from texts to present careful analyses, well-defended claims, and clear information. Students will be required to rigorously cite evidence from text to support their answers and/or reasons. The reading can be done in social studies and science, and carry over into the language arts classroom. Writing should take place daily in the form of process writing, journal writing, literary analysis, and/or informal writing across the content areas during the two month span. This unit students will focus on opinion writing and research simulation. Students need to analyze a topic presented through several articles or multimedia stimuli and synthesis the information and answer a series of questions. Both reading and writing should be integrated and include elements of grammar, spelling, mechanics, traits of writing, the writing process, author studies, genre studies, etc. Instruction should take place in form of whole group instruction in both reading and writing followed by guided reading and writing lessons differentiated to meet the needs of the learners in the classroom. The students will be expected to present an oral report/piece of writing during this unit, but can be presented in any content area. Students will demonstrate competence in keyboarding in preparation for computer-based assessments.
